

## Beiseker Curlers Win Consols

BERSEKER — Two Schmitts, a few days in Calgary took the district British Columbia players with an undefeated record in a consolation staged here.  
Rinks from Anne Carben, Holskyard, Iremora and Beiseker took part. Members of the winning rink were: L. Schmitts, Frank Schmitts, Louis Schmitts and Fred Steidinger.

## TUDOR NEWS

Mrs Paul Bushman visits a few days in Calgary last week with her daughter, Betty.

Miss Jean Stitt was home from teaching school for a few days with throat trouble.

We are sorry to hear of the death of Frederick Leonard, in the Edmonton hospital. Fred spent his boyhood days around Tudor and attended the Tudor school. We extend our sympathy to the Leonard family.

Miss Helen Miller is helping Mrs. A. Downey for a few days until Dr. Downey gets his dental office established in the Alberta Corner.

Miss Shirley Leonard was off work for a few days due to illness but is back on the job again in the bank.

Miss Vera Rutlin returned to the Bushman home after spending a week in Turner Valley.

Bert Horton, Ray Bragg, Mr. Southall and Norman Hargreave are in Glenhead at the hospital.

## SOME IMPORTS GIVEN SPECIAL CEILING PRICES

A new pricing policy on goods imported from a number of designated countries has been announced by the Prices Board. Under the new policy trade between Canada and allied countries will be facilitated and encouraged.

The new procedure will allow, after application by importers to the setting of price ceilings on goods which will not prevent their importation because of local price ceilings. It will apply to goods imported from countries where production costs have risen because of the ravages of war.

The new ruling will aid in the supply of goods available to Canadians. The goods will appear high priced in some instances but Board officials point out that they will be mainly specialty goods and will not result in a general increase in the cost of living in Canada.

The strongest bridge to other people can be built with "beans" from your eye.

## THE WORLD OF WHEAT

Better Seed, Better Crops

Since the earliest days of farming have never tried of talking about the great benefits, it is gained by the sowing of good pure seed.

Levittus 19:19 (written about 200 B.C.) says: "Thou shalt not sow thy field with mixed seed."

Aristotle, the Greek (about 350 B.C.) wrote: "A good plant is not likely to grow from a bad seed."

Pliny, a Roman writer (about 50 B.C.) told us: "After two years unless careful selections were made crops tended to revert to a common type."

Tests made each year by the "Crop Testing Plant" of the University of Alberta have shown that in variety of farmers' fields indicate that this ancient advice is as badly needed today as it ever has been for too many crops to day consist not of one good variety, but of many enough of mixtures of inferior varieties.

The purchase of some good seed, preferably Registered or Certified undoubtedly will bring splendid returns to farmers in the way of increased income and from a modest investment. But good seed this year is scarce. Those who have difficulty, therefore, in purchasing Registered or Certified seed must inquire of any agent of the companies associated with the Crop Testing Plant for the names and addresses of farmers whose stocks, on test, were found to grade Crop Testing Plant A for this is good true variety seed.

Some Shilley Leonard was off work for a few days due to illness but is back on the job again in the bank.

Miss Vera Rutlin returned to the Bushman home after spending a week in Turner Valley.

Bert Horton, Ray Bragg, Mr. Southall and Norman Hargreave are in Glenhead at the hospital.

## Sugar Price Remains Level

OTTAWA — No intention of the Prices Board to allow any increase in the price of sugar was emphasized by board officials following the Washington announcement that sugar prices in the United States may go up a half cent per pound. The increase to Canada for raw sugar will be absorbed out of the Sugar Stabilization Fund built up over the past number of years.

Increase in returns to Canadian sugar beet growers recently announced will also be granted without increasing the price of sugar to consumers. The increased assistance too on beet sugar will amount to 90c per 100 pounds the entire amount going to the growers to increase the return on sugar beets by about \$1.50 a ton.

Guard-Ten phantoms have broken out, sir.

Warden — Have you given the alarm?

Guard-I sent for the doctor, I think it's the measles.

A man can make money but money can't make the man.

## JIM HUNT PRESIDENT

Tuesday, Jan. 28. The meeting was opened by the president, Frank Emery. The minutes of the last meeting were read and approved.

Officers elected were as follows: President, Jim Hunt; vice-president, Bob Shaw; secretary, Phyllis Hunt; treasurer, Mrs. F. Emery.

The financial statement showed a balance on hand \$22.61. It was reported that the wheat drive on February 1st was well attended.

It is not as important which man control industry as which idea control the man.

## Will Survey Alaska Road

Just when the Alaska highway will be opened to civilian tourist traffic is a question that is puzzling many of us who are planning vacation this year.

The Alberta Motor Association has been informed that when the Canadian army takes over the highway from the U.S. authorities on April 1, a complete survey will be made of the route as well as factors relating to the highway and the measures to be taken in the opening of the way for civilian use of the route as early as possible. At present, civilian motorists have to get a permit to travel over the road.

Montreal provincial government travel authorities report that numerous inquiries are being made concerning the northern route. Many of those who have written for data have expressed their interest in opening tourist camps and other services along the highway.

People who have made the northern trip to inspect the highway emphasize that there is a lack of tourist facilities and this will be one of the main needs to be met when civilian travel is permitted in volume.

While areas are being turned to the Alaska highway, there are indications that travel to many Alberta holiday resorts will be doubled or tripled this year. The increase of gasoline and the restrictions has opened the way for a flood of holiday travel and this will be intensified by the fact that many popular tourist hotels closed during the war emergency will reopen this year for holiday guests.

## A World Assembly

THE RIGHT HONOURABLE ERNEST BEVIN, Foreign Secretary for the United Kingdom, has advocated the setting up of a world parliament as a means of ensuring the observance of international law and maintaining permanent peace. Leaders of other Allied nations have likewise recognized the need for some world organization on a scale larger than any which has yet been considered. It is clear that the practice of what has been called "power politics", and the attitude held in the past by some nations towards treaties and international agreements, must be destroyed. If wars are to be avoided, the prevention of these offences on the part of such nations could only be effectively accomplished by a world organization possessed of the determination and the power to enforce the law.

### A Basis For Future Cases

Some observers have seen in the trials of German and Japanese war criminals, the beginning of an international code of morals which may form a basis for dealing with any similar case which might arise. These trials have been the first in which violation of the laws of humanity have been tried by an international tribunal, and they mark a definite step forward in the way of preventing such crimes in the future. In the whole course of history it would be difficult to find examples of such flagrant disregard for treaties and agreements with foreign nations as was practiced by the Germans during the Nazi regime. Neither are there records of more brutal and inhuman treatment than that meted out by the Nazis to the people they sought to conquer.

### A Warning To Other Nations

The manner in which the war trials have been carried out, and the sentences imposed on those who have been found guilty, will remain as a warning to others who have the power to violate international agreements with so with the knowledge that they are not to be held lightly, and that there may be a stern accounting for violation of such agreements. The present war trials were organized by the Allies to try offenders from the conquered nations. To be effective in the future, such a court would have to be representative of all nations, and empowered to deal with all who attempted aggression or other acts which lead to war. A world assembly could create such a court, and it is to be hoped that this plan, proposed by leaders of the peace loving nations, may some day result in a "parliament of man" which will be equipped to do away with many of the difficulties created by the present world order.

Gives Comfort Daily

## Price Control And Rationing Information

Q—I wish to set up a new business and would like to know if it now is necessary to first obtain a permit from the Wartime Prices and Trade Board.

A—New entrants into business are no longer required to obtain a permit prior to getting a license. Licenses may be obtained by applying to the Board office in your locality. All those commencing new business are reminded, however, that the Board's regulations respecting prices require that all prices must be approved before goods are offered for sale.

Q—Is there any way in which our club may obtain extra rations of sugar and butter for reception we are having for returning ex-servicemen?

A—Because of the larger number of such recipients being held and the possible shortage of demand on already supplied of both these commodities no extra allowance is made for such a purpose. If club members wish to contribute part of their own rations they may do so.

Q—What rationing commodities are Canadian like into the United States when going there on a tourist?

A—You will require an export permit for most of all kinds and for dressed poultry. Butter and preserves may be taken out to the value of \$5, over which an export permit is required. Sugar up to five pounds may be taken without a permit. Applications for permits may be made to the Export Permit Branch, Department of Trade and Commerce, 220 Queen Street, Ottawa.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your selling prices, mentioning the name of this paper to the Wartime Prices and Trade Board office in your province.

## Work Is Changed

### Bomber Factories In Britain Are Now Turning Out Houses

Five great United Kingdom bomber factories are now turning out the world's finest prefabricated houses. This was revealed by Mr. Arthur Woodburn, parliamentary secretary of the ministry of aircraft production. Mr. Woodburn was speaking in Blackpool, England, said: "Bomber factories in the modern version of turning aircraft into prefabricated houses." Fifty thousand hangars will be produced in the United Kingdom in the next year, or two from a thousand tons of aluminium scrap recovered from obsolete aircraft—United Kingdom Information Service.

## New Type Village

### Idea of National Union of Seamen For Surrey, England

Former merchant seamen and their families are to be accommodated in a new type of village in Surrey, England. There is to be living space provided for 25 families at first. A community centre is being built, two houses, a swimming pool, tennis courts and a nursery school. The National Union of Seamen is responsible for the idea, but South Africa is so impressed with it that \$200,000 has already been contributed from that source. Materials may be sent in Britain, but somehow they seem determined to get things done for those who served the country. That is something to be admired—and possibly copied later—Halifax Chronicle.

## COAL HAS MANY USES

Coal, once regarded only as a source of heat and energy, is now a vital source of raw materials for a nylon, synthetic rubber, chemicals and other products, and may, in the future, be the principal source of automobile fuel.

## Good Meat Alternate

### Nutrition Division Says Peanuts Stand High As Vitamin Providers

When you are shopping around keep your eye out for peanuts, said the nutrition division. The nuts take high marks as providers of vitamins needed. A round tablespoon of nut butter, contains a third of the protein contained in an average serving of meat and a small package of roasted peanuts contains one-half. Peanuts are listed in Canada's food rules as a meat alternate for this reason.

## NO ORDER PLACED

MONTREAL.—D. B. Charwell, president of the federal government agency, Wartime Shipbuilding Ltd., asked to comment on Paris reports that the French government will spend \$60,000,000 in Canada for ships, said in an interview in here that no such order had yet been placed. Unless the price was right there might be any order as far as Canada is concerned.

## GET RELIEF FROM PILES This Amazingly Easy Way

## YUGOSLAVIA'S FLIGHT

Women Working To Distribute Food To Neighboring Towns

The war is now, not the women of Yugoslavia have just begun to fight.

"It's a strange thing," Gajo Ratkovic said. "They will not be defeated."

No one knows how it started, or who directed it. Perhaps Yugoslavia's women simply grew weary of watching their children die.

There would be grain stacked in one village, but none in another—and no way to move it. There would be milk for some, but none for others. There were no horses, no wagons, and no way to share the food. Then the women suddenly organized into bands.

"It was just something which happened," Ratkovic said. "Now they take the grain, or the milk, on their shoulders. One group, after taking its fair share, carries the burden from its village to the next. The supplies are picked up there and carried farther along. It takes time. Yes, it takes a long time, but they get there."

The women do most of their relay loading at night. They always back in their villages by dawn and ready with the working man's breakfast.

Ratkovic, who lived for ten years in Stettin, Pa., and returned to Yugoslavia after his father's death in 1931, served during the war as a lieutenant in Tito's Partisan army.

Now a member of the Yugoslav Red Cross delegation visiting the United States.

"We need help all right," he said, "but we'll get well without it. Yugoslavia will be back on her feet in five years, if she does it alone. Sooner, if she gets further Allied aid."

Ratkovic said that UNRRA's supplies had done a great deal to relieve the immediate physical needs of the slavs, and that the American Committee for Yugoslav Relief had sent 1,000,000 pounds of clothing, medical supplies and food during the past year.

"We need help all right," he said, "but we'll get well without it. Yugoslavia will be back on her feet in five years, if she does it alone. Sooner, if she gets further Allied aid."

## A New Idea

U.S. General Says Next War To Be Arctic Circle

General H. H. Arnold, in charge of the Army Air Forces, in a speech to members of the National Press Club in Washington made some interesting suggestions. He predicted that the next world war would take place in the area north of the Arctic Circle. This shift in the scene of hostilities presumably would be inconvenient chiefly to penguins, polar bears and roving bands of Eskimos.

General Arnold reminded his hearers that every country at present capable of waging a full-scale campaign is situated north of latitude 30 and that the shortest route to demolition of a adversary is across the top of the world.

An additional point in favor of campaigning in the frozen solitudes is that most of the terrain included is over virtually uninhabited country, and the weather is generally better over the North Pole than over the Atlantic or Pacific.

He mentioned that new and terrible weapons are being developed that could destroy centers of population without the Army or Navy firing a shot. If these dreadful engines of destruction were to be employed in waste spaces, where there are no cities to be razed, experts in ballistics and nuclear science could have a splendid time without the inhumanities that marred the recent conflict, now partly concluded.

War without barbarism would doubtless be satisfactory to the militants and the result might be just as conclusive, without casualty lists. Purple shows and supplies of gunpowder for the civilian population might appear in the communique.—New York Herald Tribune.

The prize excuse was introduced during the trial of a man charged with wife-beating. A neighbor present during the assault was called as a witness for the prosecution. He described the blows in detail and the wife's helplessness.

In astonishment the judge turned to the witness and asked: "Do you mean that court to understand that you stood by and saw this man strike the poor woman again and again?"

"Yes, I saw it all," the witness replied. "I saw him do it."

"I couldn't," the judge said. "What was it?"

"It was filling my pipe," the witness replied.

CANADA'S EATING HABITS

Dr. L. B. Pett, director of nutrition in the health department, said in an address before the Canadian association of the National Research Council, Ottawa, that the eating habits of Canadians have been improving steadily. He added that the best advice that could be given was to eat a large variety of foods.

MEANING OF BATTALION

"Battalion" originally implied a unit of infantry forming part of a line of battle. In the 14th century the battalion was the tactical unit, with an approximate strength of 1000. The number of companies in a battalion since the 18th century has frequently changed.

In 1680 Sir Isaac Newton produced a model in which the embedded jet-propulsion principle.

## British Investors

May Be Compelled To Place Money Where Government Merits

British investors probably will lose their right to place money where they please when Labor's new financial legislation is introduced in the House of Commons early this year.

The legislation is expected to give the government the power to control investment so that money will be provided for essential industries before luxury trades.

The government will argue that such authority is necessary to insure the flow of money to where it is most needed and stay until the last note was sounded or the last shot spoken.

When Nazis were banned from theatre appearances, Bogner's Munich Philharmonic was reduced from 40 to 40 members.

However, the Milwaukee said his efforts were appreciated by the Germans who were hungry for good music and good plays, and knowledge of the world outside their own homeland. They would sit under umbrellas in the leaky theatre, he must needs and stay until the last note was sounded or the last shot spoken.

## ENJOY MUSIC

The People Of Germany Are Now Claiming For Culture

When Harry Bogner, a Milwaukee architect, returned from Germany he told the story of how music and drama were restored to a German people clamoring for culture.

Bogner was sent to Germany to serve on the Allied building commission in Berlin, but he was given the job of music director for three-fourths of the American zone of occupation, when it was learned that the Allies could not get together on the building program.

The Milwaukee said he went to work in Munich where he chose the Prinz Regent theatre for his concerts and dramas. The Prinz Regent, despite its leaky and smashed roof, was the most usable of the Munich theatres.

In an effort to find scores of music which had been banned by the Nazis, Bogner said he traveled 2,000 miles and finally in Leipzig, centre of the German publishing industry, he found plates for musical scores. Three tons of the plates were trucked to Munich and the business of rehearsing got underway.

When Nazis were banned from theatre appearances, Bogner's Munich Philharmonic was reduced from 40 to 40 members.

However, the Milwaukee said his efforts were appreciated by the Germans who were hungry for good music and good plays, and knowledge of the world outside their own homeland. They would sit under umbrellas in the leaky theatre, he must needs and stay until the last note was sounded or the last shot spoken.

## COVENT GARDEN

National Institution in Britain With Roots In Distant Past

Britain is a nation of shopkeepers—and proud of it, and a duchess with a crown and a scepter.

There is a lot to be said for Covent Garden. Covent Garden is a place of great beauty and interest. It is a place where you can see the best of British architecture and art.

There is a lot to be said for Covent Garden. Covent Garden is a place of great beauty and interest. It is a place where you can see the best of British architecture and art.

## NOTES AND COMMENT

## On Home Building

Every community in Canada was urged, to organize a local committee to induce, encourage and extend welcome to our returning low and poor of the Armed Forces and to use every effort in locating them in the districts from which they emigrated. This idea was carried out with a prevalence of very close to 100 but as usual someone got the cart hitched to the horse instead of hitching the horse to the cart. How does anyone expect to keep the boys and girls in the district from which they emigrated when in a very large majority of cases the best they can find to live in would be a cave and second best a tent. As usual the small town is being overlooked. It is beneath the notice of those who are pre-occupied by looking after the housing situation. Not so in the larger centres. There they are looking after the section of homes to the hundreds, supplying labor and "sawdust" returned to life in the small town are by asking for something from which to build a home but at every turn the same is to be sold for a 45% to the Wartime Housing Commission. In some towns it is almost difficult to purchase nails with

## To Turn the Tide

Dances, radio and movie thrills, orchestra, football and basketball games, gun races, effort parents and teachers, impossible younger brothers and sisters, the dullness of home—these are what the average teen-ager thinks about all day. What we think about all day is our philosophy of life. Boiled down, the teenage philosophy is to live fun in life. They like the idea and danger of the world and the things they see to fight for a freedom from parents, teachers, preachers, and other "old-fashioned" restraints. In "old-fashioned" times that would have been called the philosophy of a "lost generation" and "lost" generation it is still all of that. But today it is all the philosophy of a "lost generation" for there are malignant anti-democratic forces of the present for personal or party power. All they have to do to get control is today's mothers and fathers' world is to keep kids mired on sex, sport and activities continue to divide them from their parents and responsibilities, produce all the liberties they want. Today, however, there is also another mark of youthfulness in the world. They still think of dates but of what they can give to a girl friend, or boy friend, not

what it to make equal. Permits for erection of businesses are being turned right and left in office but in the small town a limit of \$500.00 is placed on such moves. There is rather a hard word that applies quite aptly to such actions and it is spelled discrimination. Discrimination is as you like it is a decision of the move to keep certain services in their home districts. This procedure might be accepted by the old policy that they might as well farm but there is still only the case or tent to fall back on and anyway these boys are not all as resultantly inclined. Some of these men and women have very original ideas of their own and some of these are very decided. These boys and girls are going to be forced to take up residence in the larger centres, where most of them have no wish to go and where they cannot be absorbed in industry for the simple reason that there is a sufficient number of them. After their activities have been exhausted the larger centres will be only to give them back to their home district to look after. The effect of local real estate commission. Committees are being thrown away on the present basis.

what they can get. They still think of movies but of pictures that show our home and country as they can be clean, strong, united. They still like to use but must have that put on your way, not the kind that "sends" you. They still go for sport but go out for the game and not the box score. They still think home can be dull but if it is they see what they can do to live it up. They get all the family having fun as they pull together for a goal much bigger than it ever could be for them. They are of themselves alone. They still think parents, sisters and brothers, teachers and preachers can be difficult but they know they can change them if they start by being less difficult themselves. Their philosophy is that: "We want a different world and if the only way to get it is for us to be different first we're going to be different starting now." This gang may well change the moral climate of the world especially if you go out to help them. But it is a matter for reflection, not correction. We can turn the tide of thinking and give new direction to our youngsters, but only if we find and follow new direction in our own lives.

proposed raise in gasoline prices. Also it has asked the federal government to probe the whole situation through appointing a fact-finding board to make a thorough investigation. It is making a similar request to the provincial government.

Other organizations in the province also are preparing to lodge their protests against any raise in gasoline prices and it has been indicated that the matter will be brought up at the session of the Alberta Legislature opening on February 14.

The Manitoba government also has also expressed its opposition to the proposed increase and is making a further survey of all factors in the situation.

We stand on the threshold of a new age. But what is the idea of a new age or an age of some other kind?

## It's the LOCAL TOUCH That Really Counts

The magnetic power of local news to win and hold people's attention is as fundamental as human nature itself. Local news begins to play its part in a man's life with a one-line notice announcing his birth. Progress in school, participation in sports, graduation, engagement, marriage follow—each likely to figure somehow in local news.

Then comes the upward climb in business, perhaps an entry into politics, almost surely some activity in civic, religious and social affairs—each step productive of news that's vital interest to self, to family, to friends and fellow townspeople. So it goes till death itself writes the final story.

Only in the HOMETOWN WEEKLY NEWSPAPERS can people satisfy their craving for this kind of news, their unceasing curiosity about what goes on close to home. And only there can they find every day the local buying information they need. Which explains why largely why people read their Hometown Weekly newspapers so eagerly and thoroughly and why such weekly newspaper advertising produces such satisfactory returns.

You can't afford to neglect these buyers who live in the towns, villages and townships of Canada and are so well served by their weekly newspapers.

CENTRAL OFFICE, BRAMPTON, ONTARIO.

## OFF THE RECORD

Ottawa—The housing situation in Canada is so bad that a report in Ottawa shows that even the government has to expropriate a house to provide a home for this country's Prime Ministers in this capital.

Minister—Rustus. Don't you know it's wrong to play cards on the Sabbath?  
Rustus—Yes, parson, an believe me Al's paid for mah sing!

Fat pedestrian knocked down by a car. Couldn't you have gone around me?

Motorist—I wouldn't waste whether I had enough gasoline left.

## ITEMS OF INTEREST IN THE WORLD OF FOODSTUFFS

Below average grain yields are expected from the 1945-46 harvest in New Zealand as a result of reduced acreage and unfavourable weather conditions—Duma's 1945-46 rice crop is estimated at 172 million bushels—largely sufficient for that country's needs.

The third official estimate places Western Canada's 1945 wheat crop at 282 million bushels, compared with 292 million bushels in 1944.

Russia and France are reported to have signed a five-year trade agreement under which Russian wheat will be among the articles imported into France—Favourable weather is aiding the wheat harvest in Australia—Recent general showers have helped the Argentine corn crop.

## SEED TREATMENT URGED

Some 517 cars of nursery wheat were marketed in Alberta in the 1944-45 crop year. This is an alarming increase. Losses of this type can be entirely eliminated by treating seed prior to planting.

The mercury danger such as creosote and hexachloro active compounds control if the seed is properly mixed with the seed. Although the older method of treating with formaldehyde is equally effective injury to the germination of the seed may result from the treatment, particularly if the seed is of low vitality or if too concentrated solutions of formaldehyde are used. The best treatments are recommended.

The Department of Agriculture urges farmers to prevent further losses by treating grain for smut prior to seeding. Bulletins providing additional information on methods of treatment are available on request.

Financial Statement  
Carbon School District No. 1218  
FOR THE YEAR ENDING DECEMBER 31, 1945

RECEIPTS	PAYMENTS
Balance on hand at beginning of year	\$ 3,840.80
Net provincial grants	604.41
Tax Receipts	5,851.00
Net by school district	5,851.00

## CARBON TRADING CO.

## Proposed Gas Price Rapped

Strong protests which the Alberta Motor Association has urged to the Dominion government have been backed by other organizations in the province and also some leading newspapers. The A.M.A. contends that no price raise should be authorized before there is a complete investigation of the records of producers, manufacturers and distributors of gasoline. Such a probe would reveal the profits made by these concerns. Recently, the Prices Board announced that it proposed to increase the price of gasoline by two cents per gallon. The Alberta Farmers' Union has expressed its objection to this

# Field Marshal Montgomery Says A Visit To Canada Would Be Biggest Thing In My Life

(By Ross Munro)

FIELD MARSHAL MONTGOMERY in an interview in Germany said the two battles in which Canadian troops fighting under his command during the Second Great War were "at the top of their form" were the grim struggle at Ortona, Italy, in December, 1943, and the clearing of the Scheldt estuary in Holland in the autumn of 1944.

Wearing bleached corduroy slacks and a rumpled blue sweater, the commander of the British occupation zone sat in his office and talked with Canadian correspondents of their countrymen's fighting record. He also discussed his proposed trip to Canada which he said would be "the biggest thing in my life."

The field marshal added, however, that whether he could go to the Dominion and how long he could stay "will depend on my masters—the state."

(Field Marshal Montgomery said in an interview several weeks ago that he hoped to visit Canada next spring.)

He said that if he went to Canada he wanted to go into homes and meet soldiers and their families. He said all soldiers are different and Canadian soldiers is "at his best when he is British soldiers."

"Mentally" added he felt the Canadian soldier is "at his best when he can use his natural qualifications of initiative freely and without restraint."

"Canadians don't like being hemmed in and restricted. I would say therefore that the Canadian soldier is better in a more fluid type of battle when he can attack and kill German. He is better in this type than a tight, set-piece battle when the troops go ahead behind a barrage."

"The Canadians do best when they are given an opportunity to develop their inherent qualities and if you can give Canadians a free play they will do it. I suppose he is a man who can attack and open spaces of a great big country."

Regarding the future of the Canadian occupation force he said that Field Marshal Montgomery said if the winter goes well, then it will be time to determine when the Canadians can be sent home. The basic idea was to get them back as soon as possible and feasible.

"Canada at first was very anxious to have a share in the war," he went on. "Canada did not want there to be any idea she was pulling out ahead of the others. For instance there was the Canadian contribution to the occupation force in Berlin for example."

"I don't think there is any question of Canada withdrawing before the war is over. Careful examination is to be made of when we can get the troops back home. But nobody can say what it will be like in Germany next spring. Basically, however, the idea is to get the Canadian back as soon as it can be sent."

The field marshal expressed surprise when asked about a rumor that Lt.-Gen. Guy G. Simonds, commander of the Canadian forces in The Netherlands, might leave the Canadian Army to join the British Army. He said Gen. Simonds is "a very good soldier" and he declined to comment when asked about the long-term significance of the Canadian attack on Dieppe in August, 1942. He said his lessons were useful in dealing with beach obstacles. "But Dieppe had nothing to do with me. Prime Minister Churchill was dining with me in the desert when I heard about it."

The British commander said he would not go to Canada until the winter was over and then it would depend on circumstances what the authorities in London decided. He said he met Prime Minister Macdonald King, unofficially in London during the autumn at the home of a friend and received an invitation "to visit the home of all the friends I have made."

"I also want to see the Canadians in their own country." "Mentally" said McGill University had extended an invitation to him to receive a doctor of science degree and he thought this should be part of the itinerary if he made the trip. "It would be the biggest thing in my life," he said, referring to the trip. "I have never been to the American continent."

He had no invitation to visit the United States, though "I have a lot of friends there too."

Field Marshal Montgomery said if he made the trip it would be a real holiday and he would cross the Atlantic both ways by sea. He feels he could stand a rest, as he had no rest let-up since August, 1945, when he took over command of the British 8th Army in the Egyptian desert.

## GOLD IN INDIA

A new and rich gold-bearing reef has been discovered at the Bellara Gold Mines in the Tumkur district of the state of Mysore. It was reported, Mysore contains the largest gold mines. Details of the extent, width and depth of the new reef are not available.

## Honored By Britain

Very Seldom Women Given Award Recently Received By Canadian The Court Circular, published daily in the British press, recently contained the following: "Mrs. Leopold Amery also had the honor of being received by the King, when His Majesty invested her with the insignia of the Imperial Order of the Crown of India."

This announcement should arouse interest and gratification among the people of Ontario, as Mrs. Amery is a native of this province, being a daughter of the late John Hamar Greenwood for Whistly. Since 1930 she has been the wife of the Rt. Hon. S. B. Amery, the distinguished Conservative politician, and has been for him an invaluable helpmate throughout his long and distinguished public career.

When Mr. Amery was Secretary for the Dominions she shared his Imperialist sympathies, and her knowledge of Canada, with which she always has kept alive her ties, was a great asset to him. During his latest tenure of office under Mr. Churchill as Secretary of State for India, she interested herself in every cause which might promote the welfare of the Indian people, and labored assiduously to create friendly relations between them and the British people.

The Imperial Order of the Crown of India is a peculiarly gracious and characteristic gesture on the part of His Majesty to invite her to Buckingham Palace and invest her in a special audience with this well-earned honor. It marked his high appreciation of her virtues and public services. — Toronto Globe and Mail

## Details Disclosed

Member Of Gestapo Ties About Details Of Mussolini From Italians Being of the Mussolini kidnapping details by Lt. Col. Otto Skorzeny, Gestapo hatchet-man who was assigned personnel by Hitler to abduct his Axis partner from the forces of Marshal Pietro Badoglio.

He also was a first-class four-inch giant, told Allied interrogators he was "very much surprised" when he was assigned the assignment.

Fifty paratroopers were assigned to him and they took off from Rome Sept. 12, 1943, in a number of planes during an Allied air attack. Three of the planes were hit, but the rest landed safely, he said.

Their destination was the Sports Hotel, 6,000 feet above sea level, on Gran Sasso mountain, highest peak in the Apennines, where Di Cione was being held prisoner.

"A parachute jump from such heights is such a small target seemed not feasible," Skorzeny said. "Although this was against strict orders, we decided that a crash landing was the only possible solution. We landed 15 metres from the hotel. Two more planes followed our example."

"The guards were overcome. More of our planes landed with the loss of two lives and several wounded. A few shots were fired, but the Italian militia in command realized our numerical superiority and did not put up much resistance."

Mussolini was taken to a nearby airport, Skorzeny said, and they took off in a plane which had been sent to pick them up. He added that the next day he took Di Cione to Hitler's headquarters and "my task was completed."

## Population Shifted

Canadians Living In Different Provinces As Result Of War More than 124,000 Canadians are living in a different province as a result of the war. Four of the provinces—Saskatchewan, Manitoba, New Brunswick and Prince Edward Island—lost people, while the others gained five provinces in population.

New Brunswick lost 10,412; Prince Edward Island 5,803; Manitoba 35,480 and Saskatchewan 84,402. Ontario gained 54,171; Nova Scotia 22,153 and Alberta 20,314.

The only two continents on which certain kinds of birds have become extinct in historic times are Australia and America.

THRILLED BY SIGHT OF SNOW—It is an ill that doesn't admit of remedy. While most people shuddered when they woke in the dead street covered with snow, these girls from India, students at the University of Toronto school of nursing, were thrilled at the sight. "It is beautiful," they chorused. The native air born by Mrs. May Astor John Deen, right, and her maid may appear incongruous in Canada, but she was anxious to try the sport. Her friend, Mrs. K. Ryang, went along to watch.

## Cayenne Pepper

Named After A Town In French Guiana In South America

Cayenne pepper is a product of a totally different plant from the one which supplies black and white peppers. Cayenne pepper is the ground pods of the different species of the Capsicum plant. Pods of smaller size are used entirely in pickling and are known as chilies. What is known as the Guinean pepper has many garden species, and together with the spirit pepper (Capsicum frutescens) are the chief sources of Cayenne pepper, which is named for Cayenne, a town in French Guiana, South America. Originally a native of South America, the varieties of Cayenne are now grown in tropical and other countries both of the New and the Old World.

Some think the name Rome is derived from the word "runner" meaning river, so that Rome would signify "city beside the river."

## Care Of Farm Animals

Isolated Stock In Granular Form Should Be Used

There is no area in the province of Manitoba where iodine may be safely left out of the winter ration of farm live stock. At the Dominion Experimental Farm at Brandon, isolated salt in granular form is used regularly. For breeding stock, an additional allowance of potassium iodide is supplied in the feed daily during the winter months. Two ounces of potassium iodide are dissolved in a gallon of water, and a teaspoonful of this solution is added to the feed or drink for each brood sow daily. The allowance given brood sows is double that amount daily. For breeding ewes, the addition of two ounces of potassium iodide dissolved in a small amount of water and mixed with one hundred pounds of salt, meets their needs. All over Canada, winter is the time when the feeding of potassium iodide to breeding animals should be commenced.

# Gloomy Picture Is Presented In Germany With The Threat Of Grave Privations This Winter

MOST of Europe has ended the year of Germany's defeat in terrible plight, dreading the depth of winter with its threat of grave privations and sweeping epidemics of disease and death. It is a picture of a continent raked by war practically from one end to the other—of hundreds of ruined cities, ill-fed people, wandering millions, cold, depression and gloom.

## Has Earned Rest

Viscount Gort Had Many Difficult Jobs All Through War

It is small wonder that Field Marshal Viscount Gort, V.C., has found his duties as British High Commissioner in troubled Palestine so arduous and exacting that his resignation has taken effect. For Viscount Gort has found himself in the midst of many and great trials during recent years and he has undoubtedly earned a respite from such a life.

When the British Expeditionary Force went to France early in the war, it was commanded by Viscount Gort. It was his unpleasant duty to lead it through the difficult and embarrassing retreat after the German had broken through and to see it safely off the beaches of Dunkirk when French resistance was collapsing.

Gort and his deputies, including Alexander and Montgomery, got much of the expeditionary force back to Britain but was given little rest. For he was eventually sent to Malta which was among the really "tough spots" of the war. And from Malta, he went to Palestine, where he had to oversee the evacuation of Jewish refugees who had been driven to the island by the war.

Viscount Gort is a brave man—his V.C. being proof of that—but he must also be a man of great tact and common sense. He does not seem to be expected. He deserves a rest—Brookville Recorder and Times.

## Golf Tournament

Prominent Sportsmen Are Planning For A Contest In Winnipeg In July

W. C. (Bill) McCullum, head of a group of prominent sportsmen, said that Winnipeg will be the scene of a \$10,000 golf tournament next July.

Tentative plans call for the tournament to open July 19. Eighteen holes will be played during the first day, followed by 18 July 20. Practice rounds will be held July 17. Mr. McCullum said the tournament will be approved by the Canadian Professional Golfers' Association and the PGA of the United States. He said top players like Byron Nelson, Sam Snead, Jug McSpaden and Ben Hogan are expected to attend along with Canadian high-ranking golfers like Ken Black, Stan Horne and Bill Kerr.

He said that an effort is being made to guarantee a special money prize for the best Canadian professional. The tournament probably will be limited to golfers of four-handicap caliber and better.

## Program In Far East

Appears Better For Japan Than For Other Oriental Countries

Both evil men and evil institutions in Japan are disappearing, one by one, which leads to the thought that the Allies seem to have had a better program for their enemies in the Orient than for their friends. American actions in Japan, which appear to have the approval of most Allied leaders, have been more intelligent than America's actions in China, which resulted in better controversy and a complete change in policy. They are based on a far more sane and far fuller program than is being followed in many other areas of the Orient. If such a program can be devised for the Japanese, who cannot be made for the people of Korea, of Siam, or Indonesia, or Indo-China? Why should the Allies be content to fumble anywhere in Asia when they are making such good progress in dealing with the complexities of Japan? — New York Herald Tribune

## FRANKIE ROSES

TO produce more satisfactorily hardy roses on the Prairies, hybridizing has been under way for 17 years at the Dominion Experimental Station at Morden, Manitoba. Many varieties have been hybridized from typical stock for extended testing. Many species of roses from the Far East, Western Asia, Europe, and Persia, as well as two native varieties have been employed.

## MORE FORGOTTEN

The end of the war has left people more worried than ever, and the result they are increasingly abandoning, says London Transport, is a growing number of forgotten gloves, umbrellas and spectacles.

One optimist expresses the hope that among the post-war inventions will be a combination bathbath and telephone disconnecter.

On the reverse side are thousands of miles of repaired railways, rebuilt bridges and roads. Many fundamental services such as light and gas are operating again, and despite the immense problems confronting them, most countries are confident the worst will be over if they survive the winter and get a good harvest next summer.

Politically much of Europe is in ferment as the reestablishment of political freedoms shake down to workable and democratic governments. In free elections which have been held the general trend has been toward the left, with the danger of deterioration of the old right wing groups.

Here in Germany, conditions are as bad as anywhere. There are so many homeless people, so many shattered communities, so little food and fuel and Allied control commission authorities fear a major disaster that would have sharp repercussions throughout the continent. Berlin and the Ruhr are two great danger spots of Germany.

In Poland conditions are reported to be the worst. In Czechoslovakia and the Balkans the grave economic consequences of the war are underlined by the grim circumstances in which most of the people will endure the winter.

Western Europe is much better off, but even there, by Canadian standards, there are sharp shortages of everything really to gain ground in their recovery.

France still has slim rations. There is not nearly sufficient coal for domestic purposes. The people need security. Life is far from gay in the Fourth Republic.

Belgium has made the best overall recovery. But even when people talk blithely of the country being "right back to normal" they are exaggerating. More coal is needed, more food, raw materials, rolling stock, and replacements for industrial equipment.

In the brief period since the liberation by the 1st Canadian Army Holland has made remarkable strides but there also is the desperate need for coal, food and clothing.

Denmark and Sweden came out of the war with comparatively little suffering and have not the worries of other nations but Norway is desperately short of many foodstuffs. In central Europe masses of displaced persons present grave problems, along with the transfer of large numbers from one zone of Germany to another, and from Austria and Czechoslovakia to Germany.

The United Nations Relief and Rehabilitation Administration is taking steps to deal with this problem and in the Balkans, Poland, Italy and Greece the full UNRRA program is being carried out to prevent starvation and aid recovery.

## Charming Handiwork

With this floral embroidery you can charm all your friends. The pillow cases into pieces of lasting beauty. It's easy to make. To obtain this pattern send two large cents in stamps cannot be accepted. Write to: Housatonic Art Department, Winnipeg Newspaper Union, Name, Address and Pattern Number.

WORLD HAPPENINGS  
BRIEFLY TOLD

Temple church, famous London landmark wrecked by bombs during the blitz, is under reconstruction.

Nearly 40,000 ships were piloted in the River Clyde in 1944, with a gross tonnage of about 120,000,000.

The mailboat London-Istanbul has resumed service between England and Belgium.

Helsinki radio said the Finnish parliament has voted to nationalize Finland's banks.

The Soviets have ordered 21 compressors for their first natural gas pipeline that will extend 500 miles from the Ural mountains to Moscow.

St. Leonard's Pier, wrecked during the war, may never be restored. The post-war reconstruction committee has recommended that the pier not be rebuilt.

The Hollywood Veterans Service center announced that gratuities will be paid to 12,811 U.S. veterans who served in the Canadian forces during the last war.

The Prices Board disclosed in Montreal that Canada shipped well over 100,000,000 pounds of fresh meat and 10,000,000 containers of canned meat to Europe during November.

Even the early morning sea will be warmed to order at a luxury holiday camp in England, planned by Margate Corporation at a cost of 10,000,000 (£100,000). There will be a large sea-water swimming pool.

## Japanese Of Old

Christians Were Treated Cruelly By Emperors In Seventeenth Century

Compare this freedom of worship (granted by Gen. MacArthur to the Japanese) with the treatment meted out to Christians, native and foreign, by the emperors in the seventeenth century. Writing of the religious persecutions, Dr. J. Ingram Bryan, former professor in Japanese universities and later lecturer in Japanese history at Cambridge, says "the extermination of the Christians in Japan forms one of the most cruel and thrilling records in the annals of history."

It was not idyllic. Scrape of foot, broken animal bones and lumps of meat were the only food we even found a calf's head in a bed. Yet the house was quite comfortable furnished. You must remember that there are not, and were not, any trees in Orkney. So in default of wood, that must have decayed long ago, all the furniture had to be made of stone, and that is durable. A peat fire had burned on a central hearth. Beds stood on either side with stone legs. There were cupboards in the walls for personal possessions, and against the back wall stood a very modern-looking stove with stone chimneys and stone uprights. A crane ran under the floor and descended into a central cove.

The Japanese are not now encouraged to look back on the past, but forward to a more enlightened future; but when they do recall their national chronicles they will find plenty to justify the action of Allied headquarters that no violent "revelations" need be anticipated from the policies adopted, which are merely a self-comparison with the merciless conduct of the shoguns—Hamilton Spectator.

## Many Dangers

Causes By Which Many Lives Are Needlessly Sacrificed

There are three things this newspaper has harped upon from time to time in the hope that our armamentizing will do some good. We make no apologies for restating them. One is to guard against bulls, which are intrinsically creatures, whether it is to be on guard against letting a gun go off, whether at home or in the woods, and the other is to be cautious in the application of coal oil to kinkies in the hair. From each of these causes many lives have been needlessly sacrificed.

Remember them — St. Thomas Times-Journal.

## More Empire Talks

The Australian Government Talks Frequent Discussion Of World Be Advisable

Australia wants more regular and frequent discussions between Britain and the Dominions, it was learned at Sydney.

The Australian government is pressing for the establishment of machinery in London which would enable closer consultation and co-operation among members of the British Commonwealth on matters affecting trade, finance and defence, usually reliable sources said.

Defence Minister Beasley, who has gone to London by ship to take up the post of Australian ambassador, later in London, will make strong representations to Whitehall that the Dominion governments be consulted on all important matters before final decisions are taken.

## CHARIOTS SET GAUGE

The standard gauge used by American railroads—four feet, eight and one-half inches—comes from the fact that ancient Roman chariots used that gauge and subsequent vehicles of transportation followed suit.

**THEME SONG MARKS BRAND NEW FAD—You take a metal ring and place it before your face—so. Then you pucker your lips and hold it too hard. It helps if you close your eyes, but then you can't see the result of your efforts: a brilliant stream of many colored bubbles that explode after travelling 10 feet. There are hundreds doing this thing. Young, and old, veterans and amateurs, are dipping the metal ring in a jar of soda (at no extra cost) then relaxing on the sofa to collect their products. A good bubble-blower can waft a thousand bubbles ceiling-wards in less than four hours. If you get lazy, you can wave the ring with your hand. An electric fan can do wonders.**

## Stone Age House

Drifting Sand Made Owners Abandon It 3,000 Years Ago

Professor V. Gordon Childe in London Calling, says: "One I was really lucky. I got into house of the Stone Age just as it had been left by the occupants over 3,000 years ago. That was in Orkney on the Atlantic Coast. The house had been uninhabited in a frightful gale that set the sand dunes adrift. Having only bare hands and small home shovels, the inhabitants could not clear out the fast driving sand and were forced to leave the place. The sand blew in and filled the dwelling. When we cleared it out, we found everything just as it had been left so precipitately, and thus had a very realistic picture of life in Stone Age Scotland."

It was not idyllic. Scrape of foot, broken animal bones and lumps of meat were the only food we even found a calf's head in a bed. Yet the house was quite comfortable furnished. You must remember that there are not, and were not, any trees in Orkney. So in default of wood, that must have decayed long ago, all the furniture had to be made of stone, and that is durable. A peat fire had burned on a central hearth. Beds stood on either side with stone legs. There were cupboards in the walls for personal possessions, and against the back wall stood a very modern-looking stove with stone chimneys and stone uprights. A crane ran under the floor and descended into a central cove.

The Japanese are not now encouraged to look back on the past, but forward to a more enlightened future; but when they do recall their national chronicles they will find plenty to justify the action of Allied headquarters that no violent "revelations" need be anticipated from the policies adopted, which are merely a self-comparison with the merciless conduct of the shoguns—Hamilton Spectator.

## Must Verify Date

If United States Claims Honor For First Christmas Card

Ernest Dudley Chase of Boston, greeting card designer, publisher and collector for 40 years, has found the world's earliest Christmas card—maybe.

Published in Albany, N.Y., it will take the honor away from England, if he can verify the date, believed to be 1839.

"An 1842 design by W. M. Egley, Jr., of London, now holds the record," said the 67-year-old dean of American card designers. "It was discovered in the British museum just before the second World War. Up to then J. C. Horsely's card, published in 1846, was supposed to be the first."

An executive of Russ, Craft Publishers, where his office walls bulge with enlarged replicas of old Christmas cards, Chase displayed the treasure, and for which he paid \$150. Sketched by Portes and lithographed by R. H. Pease, Albany, the little card—dated 1839—has five panels of festive scenes. Beneath Christmas and New Year's greetings are lines for the names of sender and recipient. Across the top is a head of St. Charles and the words:

"Peace's great variety store in the Temple of Fancy."

A good detective like all collectors, Chase tracked down Pease to 1839, at which time the Albany directory listed him as an engraver, but it still not sure when the "Temple of Fancy" was built.

"If only he'd put the date on," the card collector sighed, adding: "But I'm quite sure it's the earliest American Christmas card."

Chase considers the late Louis Prang, also a Bostonian, "the world's greatest greeting card publisher. Prang, in business in nearby Roxbury from 1874 until 1880, was, Chase said, "a genius in his own way. He printed Christmas cards in 24 colors. We do well nowadays to use five or six."

England, oddly enough, was Prang's first market and he was as successful there as in this country. His custom of offering annual prices of \$2,000 and \$1,000 for designs attracted famous artists.

The Prang cards of 60 and 70 years ago were fringed and frosted and sometimes encased, so that lucky recipients could use them as sachets. Christmas cards suffered an artistic decline when he died, Chase recalled, and were brought back in the early 1900's by two other Bostonians—Alfred Eastwell and A. M. Davis.

Since War Ended People Are Not Reading As Much

C. F. Jennings, Ottawa's public library believes that the public is curbing up with a good book has "gone out of fashion"—at least in Ottawa.

Commenting on the decline in Ottawa's library circulation for home reading, as shown in his report for November, Mr. Jennings said that reading has apparently become a thing of the past since V-Day.

"With the end of the war and the return of the boys from overseas it seems that people just don't have time to sit in and read any more," he said.

If anybody told me, two years ago, that today I'd be living on an uncharted island somewhere in the Pacific, dressed in a sarong, dodging King Tut . . . it's my own fault. Henry was a good husband, according to his ideas. Kind, but groat—always talking about his golf score, telling the same old chestnuts. But the thing that got under my skin was that suffocating passiveness.

"Henry," I used to say, "marriage is a partnership, not a dictatorship. You knew when you married me that I'm nuts about flying."

He would mutter something about a woman's place being in the home, fidgeting. A bromide like that. He probably had about as wild a vision that a platinum circle, third finger left hand, would alter the whole pattern of my existence.

Oh, we both tried. But it infuriated Henry to have me thumb my nose at convention—and I never could abide a stuffed shirt.

It was when I took up solo flying that things really started in earnest. "Suppose," Henry would jitter, "that something went wrong. Airplane insurance can't be fixed with a broom stick—or a harpoon." That was the final insult. I set my jaw and determined then and there to fly the Pacific—alone.

I did make one compromise with Henry—that would be my last solo flight. I can still see his face—worried and waxy, as he dejectedly alongside my plane that day I took off. Reminding me, by pantomime, to keep in touch with him by radio. Well, I did, until . . .

After the first grunting anxiety of the take-off it was glorious. I climbed rapidly upwards, soaring high above the clouds of safety. How I revelled in that divine sense of freedom! It was a bird's—long eagle—no lie, no fattery—except for a hint of Henry's face, and that kept floating before me, anxious and pale.

I spoke to him occasionally through my little hand mike, and kept the

radio tuned to a powerful broadcast station from which, by previous arrangement, Henry was allowed to interpolate a word to me between mutinee dance numbers. In a way it was pleasant to think of him sitting there, waiting.

At first there were glimpses of the ocean. Then the fog closed in and I was sailing along between two white blankets. Hour after hour of that. And that eternal whiteness, monotonous and unrelieved, probably had a great deal to do with what happened. I heard Henry's voice, with a note of panic: "Brenda, why don't you speak to me?" Then the radio went dead.

What a difference! Suddenly I wasn't an eagle any more. I was a speck, a dot, an atom—hurtling through space. No heaven, no earth, no horizon. I felt I was making contact with the void of the world.

A blue patch opened below me and down I swooped. I don't know what I expected to find . . . the long smoke-thrums of a steamer, perhaps. Nothing but blue. I watched my glasses flash searched the horizon. Then I almost dropped them. No islands were charted for this part of the Pacific, but that distant bird companion. I found myself mentally shrieking that this couldn't be happening to me! But it was. There was no doubt about it—I was lost.

That was when I cracked. With-out attempting to weigh the consequences I made for that distant bird. The shock of the impact must have thrown me clear of the wreck, for when my eyes focused much later the plane was a charred mass, and all around me were grinning brown faces.

Seven hundred days ago—or is it years? Unless, of course, some of these grinning shogrines have been monkeying with the jar of pebbles I call a calendar.

I wonder—daily, of late—I shall ever be rescued. Probably not. Until yesterday no steamer has been made this island. I won't hear for the party. The natives must have slipped something in my coffee, so to speak. When I woke the boat was gone. Business as usual, except some of the natives were dressed in new beads, or scrapping over a few yards of gauzy calico. I took the first of a hand in that I can use a new arrow.

Hello, what's this? An old newspaper, by all that's holy! Left hand, probably by one of the sailors.

It has my name in it! So . . . Given up for lost . . . Declared legally dead. And Henry's name, too—coupled with that of . . . Valeria Blaine.

So you see, Well, I suppose a man gets lonely.

She always did go for Henry—that Blaine person! Oh, I reckon she'll make him a good enough wife. The sort that Henry wanted me to be. Sometimes I go almost insane—forever looking at these grinning faces—all so alike. Except King Tut, as I call him. And he's the most alike of any of them. Teeth. What's that? He says I am to think nothing of it—he himself has four wives and thirteen children!

Good heavens—the creature actually means it! Look here, you brown ape—don't be that way . . . Oh, Henry!

## Royal Bank Assets

Top \$2,000,000,000 In New High Records Revealed In Annual Statement

New records in the field of Canadian banking are revealed in the Annual Statement of The Royal Bank of Canada, for the year ended November 30, 1945. Total assets, which increased during the year by over \$217,000,000 have reached a total of \$2,007,546,978 which is not only a new record for the bank, but the first time the assets of any Canadian bank have reached the two billion dollar figure. Total Deposits, which a year ago stood at the record total of \$1,976,884,096, are again up, having increased by more than \$211,000,000 to \$1,888,577,074. Deposits by the public are also at the new high level of \$1,583,360,294, an increase of over \$105,000,000. That the scale of private savings, steadily on the increase through the war years, has been well maintained is reflected by savings deposits bearing interest totaling \$711,581,119. This figure compares with \$592,851,469 in 1944.

Current loans both in Canada and abroad are higher than a year ago, and have reached a total of \$383,424,566 as compared with \$350,625,756. The downward trend of current loans in Canada noted in last year's report has been reversed, the figures under this head showing an encouraging increase of some \$25,000,000. At the close of the bank's fiscal year on November 30th such loans totalled \$282,280,294, an increase of more than \$22,000,000 over the figure for the previous year. Current loans outside Canada, which a year ago stood at \$101,144,270, are higher by \$9,222,736 to \$110,367,000. The increase of some \$25,000,000 is also shown for Call Loans in Canada, probably due in large measure to the temporary acquisition of funds available to investment dealers in the financing of purchases of the 6th Victory

The liquid position of the bank is, as usual, very strong. Liquid assets are substantially higher than a year ago and now total \$1,508,477,086 which is equal to 74½% of the bank's liabilities to the public. Included in these liquid assets are Dominion and Provincial securities valued at \$882,039,866, an increase of more than \$72,000,000 over the previous year. The balance sheet also reveals an increase of some \$200,000,000 in the bank's holdings of public securities other than Canadian. These consist primarily of United States and United Kingdom Government securities.

The bank's profit and loss account for this year presented in a somewhat different form to that previously. Profits, after the usual contribution to the Pension Fund Society and appropriation for Contingency Reserve, amounted to \$6,002,142. This amount \$2,175,000 has been set aside for Dominion Government taxes, leaving a net profit for the year of \$3,828,142. The comparative figure for the previous year was \$2,832,184. From the net profit \$729,395 has been set aside for Bank Premises and the dividends amounting to \$2,100,000 paid, leaving \$998,847 to be carried forward to surplus which now stands at \$2,346,518.

## ADVERTISING PAYS

In New York, a quality leather goods shop advertised a \$2,000 travelling case for the luckiest man who could find it. It had made only one sale. But orders for five others were quickly taken when the demand appeared. The case was handmade of domestic alligator and lined with Scotch plaid and set off with gold-plated hardware, containing plastic-backed brushes, gold-plated manicure set, leather-covered eight-day clock and lotion bottles with gold-plated screw tops in gold cases.

## LE-LOD JOAN B. KENNEDY RETIRES

National Defence Headquarters announced recently the retirement from the Canadian Women's Air Corps, Lt.-Col. Joan B. Kennedy, of Victoria, B.C., after more than four years service. Lt.-Col. Kennedy, officer administrator, retired from her post on October 1942, and recently General Staff Officer, Grade 1, of the branch of the Master General of the Ordnance, N.D.I.H., was the first commissioned officer of the Corps. Previously she had been instrumental in helping organize the Canadian Women's Air Service Corps, at the start of the war in 1939, and this idea of a special discipline for the women of Canada in wartime spread throughout the country. The CWAC was formally instituted in July, 1941, and in March, 1942, became part of the Canadian Air Force. It has reached a parade total of more than 10,000 ranks. Lt.-Col. Kennedy is in the course of organizing and administering the CWAC, travelled extensively throughout Canada and in the United States as well. Born in England and there throughout the first Great War, Lt.-Col. Kennedy returned to her native land on duty for part of 1942 and 1943, when CWAC personnel overseas were first stationed there.

## CWAC HEAR PADRE

Many of England's beauty spots were viewed in natural color by the members of the Canadian Women's Air Corps, Regina, when Major J. Wilcox Dugan, army padre, who spent five years overseas, gave an illustrated talk on gardens and homes in England. The pictures also included many of England's most famous old churches of various architectural styles, and many views of English garden beauty. Spots of historical significance were included in the views, such as Florence Nightingale's birthplace, and Jane Austin's and Paul Bunyan's homes. Some of the estates occupied by the Canadian army during wartime, were illustrated, and there were views of battlefields and of graveyards where Canadian war dead lay buried. Major Dugan travelled extensively in England, going 10,000 miles by motorcycle.

## WOMAN BARBER FORMER MEMBER OF CWAC

Miss Finch has been barbering since 1937. When she joined the CWAC she was the only barber in the organization. When Miss Finch started her career as a hairdresser, back when times were not so prosperous as they are now, she found that she should make a better job of things barbering. So she entered a barber's school, and on completing her course, set up a shop of her own. She chose her business to join the CWAC. It was here that she established the first beauty parlor at Dundas, and operated others wherever she happened to be stationed.

## Wins Scholarship

Rhodes Scholarship For Manitoba Is Won By A Winnipeg Man

Robert J. Mayne, of Winnipeg, has been awarded the Rhodes scholarship for Manitoba. He was chosen for his academic standing, leadership initiative, more qualities, courage and physical fitness and the fact that he served in the Royal Navy also was in his favor.

Mayne was born in 1920 and was educated at the University of the United Kingdom. He was an ordinary seaman in 1940 but was commissioned several months later.

This year he is attending the University of Toronto for a master's degree in political science.

## This Week's Pattern

## By ANNE ADAMS

What every woman needs—a good, all-purpose shirtwaist fork. Pattern 4508 has time-saving front buttoning. Note wide size range: 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48. Size 36 takes 3½ yards 36-inch fabric. Send twenty cents (20c) in coins (pattern cannot be accepted) for pattern. Write for plain size. Name, Address and Style Number and send most effective means for this purpose, Postpaid. Write to: Adina Patterson, Dept. Winnipeg Newspaper Union, 25 McEwan Ave. E., Winnipeg, Man.

## Old Archie Says-

We are informed that Mrs. Robinson and Clifford Smith are becoming expert snow shovellers. Wonder what happened to the old chest.

Some weeks ago a number of citizens received notices from the village council requesting them to refrain from the practice of depositing ashes on the street adjoining their premises. Last week while on a tour of the village we discovered that the main street in front of the VILLAGE OFFICE is fast becoming the final resting place for the ashes from stoves and furnaces; another party has taken it upon himself to pave the street in front of his residence with ashes, and still another on the main drag appears to have difficulty in having the ashes removed in the spring.

How about it, Town Fathers, let's stop 'em all.

And then there is the report we dug up about the local bus company keeping company steadily with a cute little blonde. The report goes that it's seven miles a week. Oh, well, gone with the aid of the old Hudson and a set of good skills he can keep up the record.

Understand that Rusty and Cuddles are busy selling shares in their coal mine.

## NATION SAVES TONS OF MEAT

OTTAWA—Under meat rationing between 145 and 150 million pounds less meat is being consumed in Canada.

## KEEP YOUR HEAD

If you can keep your head and calmly ponder  
How silly spending drives up prices high  
If you can save the cash you'd like to squander  
And only buy the things you need to buy  
If you can do your part to halt inflation  
By simply being thrifty with your self  
You'd do a vital service to the nation.  
And furthermore you'll benefit yourself.

## SEEDTIME AND HARVEST

By DR. E. W. HEATZ

Director, Lias Elevator Farm Service, WINNIPEG - Manitoba

## Deadly Poles.

Water Hemlock is very poisonous and quite common in ditches and wet ditches. Cases of livestock poisoning are reported from time to time and would probably be much more common were it not for the fact that the plants have a very bitter taste and are not relished by farm animals.

The tall leafy plants with small white flowers in flat-topped clusters and growing in wet places familiar to all observant Westerners, are almost sure to be either Water Hemlock (very poisonous) or Water Parsnip (harmless). Every one should be able to tell the difference and the best way is to pull the plants and examine the roots. Water Hemlock has several thick, fleshy roots, just underground about the size and shape of a man's finger. Don't bite into them because death may be quick and painful. Water Parsnip has numerous fibrous roots, but no thick ones.

The two species may also be distinguished by the shape of the leaves. Photographs of entire plants of each, and of roots have been reproduced on a printed leaflet. Copies may be obtained free of charge from Lias Elevator Farm Service, or from school teachers, or by mail, directed to the farm service of the opportunity. Water Hemlock in pastures should be pulled and burned, especially if feed is running a little short and stock generally hung-

Pledging Price Board Chair-

man Donald Gordon complete sup-

port until the task of price con-

trol is completed, heads of Wo-

men's National Advisory Com-

mittee of the Board all across

Canada, have concluded a three

day conference in Ottawa. Byrne

Handers, director of Consumer

French, presiding over the session

at which Mrs. Frank Conroy of

Edmonton and Mrs. R. L. Nicol-

son, Calgary, represented Alberta

women.

## OFF THE RECORD

OTTAWA—Judging from com-

ment heard along Parliament

Hill now a days, it would seem

that while Indians may have a

most difficult task to raise their

rents at the present time under

control orders, yet later it will

be the tenants in depression days

who will have a most difficult

task to raise their rents!

There is no "I" in it if you real-

ly know how to spell "DEMO-

CRACY"
